

# Quick Start for EagleRIP Flexo

## 1. System Requirements

CPU: Intel (R) i7

Memory: 4G or above

Hard Disk: 200G free space

Network: 100MB Ethernet

OS: Windows 7/8/10/Windows 2012

## 2. Installation Sequences

(1) If the computer has been installed an old version of EagleRIP, please uninstall it first and then install EagleRIP Flexo5.

(2) Open "AutoRun.exe" file on the CD-ROM of EagleRIP Flexo, click on "Install EagleRIP", and follow the instructions to complete the installation procedures.

(3) Open "RIPLicenseManagement" program, and activate the license with the authorization code (16-chars or numbers) that could be found in the box or would be requested from your provider.

(4) Open "AutoRun.exe" file on the same CD-ROM, click on "Install RealDot Viewer", and follow the instructions to complete the installation procedures.

## 3. About Flexo Screenings

### (1) FlexoRound 1 or 2 screening:

This is the standard flexo screening in EagleRIP Flexo, it is pure round dot shape with 7.5 degrees offset. You can check the bitmap in EagleRIP preview window or RealDot Viewer.

### (2) FlexoRound Balance 1 or 2 screening:

This is the optional flexo screening in EagleRIP Flexo, on highlight adopt dots with different sizes: small, medium and large, increase gray level.

This special technology breaks the limitation of highlight dots in flexo printing, reproduce 1% or smaller dot.

### (3) Miracle Cell technology:

This technology will increase ink density of shadow in flexo printing, this special technology greatly improves the shortage of insufficient solid ink of flexo printing.

When you select FlexoRound 1/2 or FlexoRound Balance 1/2 screening, you can check "Miracle Cell" option.

Please use TIFF template, select FlexoRound 1/2 or FlexoRound Balance 1/2 dot shape in EagleRIP Flexo.
