EagleRIP Flexo

PDF 1.7 - PostScript 3 for superb quality documents

Founder's EagleRIP creates superb quality PDF and PostScript jobs. Complex documents, vivid colors, transparent objects, files with embedded ICC profiles and smooth shading are consistently processed to meet the high standards of the most demanding customer. EagleRIP provides support for features within PDF 1.7 and PostScript 3.

Higher quality print with screening options

EagleRIP screen dot shapes allow users to select the dot that ensures maximum printing quality. Ten standard screenings include Euclidean Round, Rhomb, Ellipse, Diamond, Pure Round, Sharp Ellipse, Square, EagleAM, Gravure and FM screening. Optional screenings are EagleFAM (AM & FM hybrid screening), EagleFM (Second order FM screening), EagleAGS (Accurate Gravure screening) and EagleAM-F (High frequency screening for newspaper printing) are available as plug-ins.

Save media and time with ganging

EagleRIP Ganging Viewer allows the operator to view multiple pages simultaneously, thus reducing the time spent to confirm that all pages have the correct content, and image data is in the correct orientation prior to output. Ganging can be either automatic or by manual control providing maximum flexibility.

RealDot Viewer to ensure output quality

Preview real dot on monitor, measure dot angle, frequency and ink coverage etc.

Performance of screening technology that meets your needs of Flexo

FlexoRound Screening & Miracle HD technology for Flexo

FlexoRound screening

- Pure round dot shape with 7.5 degrees offset

Miracle HD technology for Flexo

- On highlight adopt dots with different sizes – small, medium and large, increase gray level.
- This special technology breaks the limitation of highlight dots in flexo printing, reproduce 1% or smaller dot.

- Miracle Cell technology: Increase ink density of shadow in flexo printing, this special technology greatly improves the shortage of insufficient solid ink of flexo printing.

Support zone screen file

Support zone screen file generated by Founder PaSharp Screen#, specify different screening parameter for different object.
