Founder Fonts shined out in ESEC 2012 in Japan

Founder took part in ESEC2012 in Japan. ESEC was held May 9th – 11st, 2012. It has been successfully held 15 years since the year of 1998. ESEC gathers everything required for embedded systems from software, hardware and components to systems integration and development platforms. Founder took part with Founder Fonts and other solutions to ESEC.

Founder is the first professional company to engage in the development of Chinese fonts, and now the biggest Chinese font supplier in the world. Founder has had several hundred font libraries, including Chinese language, western language and minor ethnic languages. Domestically, nearly 90% commercial newspapers, publishing companies and printer use Founder Fonts to publish and print numerous newspapers, books, journals, files, teaching and packaging materials. In overseas markets. Founder Fonts has captured a leading share of the Chinese font market.

Nowadays, there are more requirements for computerized fonts in types, quality and appearance. Therefore, Founder is devoted to developing high quality fonts, such as video fonts, mobile fonts, customized fonts, and making people to be more familiar with the computerized fonts. Founder can meet demands in different fonts from every industry.

Founder took part in PPPE 2012 in Shanghai

Founder took part in the 20th Shanghai International Print, Pack & Paper Expo (PPPE2012). PPPEXPO 2012 was held on July 11 – 14. Its show area reached to 180,000 square meters. As the great part of APPPEXPO, the 20th Shanghai International Print, Pack, Paper Expo and Shanghai International Printing Week displayed printing machines, packaging machines, printing consumables, printing & packaging products and various creative design works. These two events gathered the top enterprises, elites and final users from printing, packaging, paper box and converting industries. Founder EagleJet H series showed up on the EXPO.

Founder EagleJet H series is a digital printing solution widely used in variable data printing, marking, coding and package printing. It has broad applications such as billing, one-to-one marketing pieces, direct-mail advertising, labeling, tags, tickets, addresses, postal codes, date codes, bar codes (including one and two dimensional barcodes), graphics and symbols, which enables the traditional printer to enter the digital market through customizable print head combinations to suit specific requirements. EagleJet H series utilizes Drop-On-Demand (DOD) Piezoelectric print head, with the total print width up to 10 inches, and can be easily integrated into conventional printing solutions with the printing speed up to 120m/min. With EagleJet H series, UV curable, Oil-based and Solvent-based inks; Paper, PP Synthetic Paper, PET, PVC, PE, PP Film in addition to many other specialty substrates could all be taken into consideration. This selectively choosing cost-effective inks and substrates significantly lower the running costs.

Technical Parameters of Founder EagleJet H 300

Print Engine	Drop-On-Demand Piezoelectric Inkjet	
Print Unit Width	12.57 mm ~37.71mm	10.7 mm ~64.1mm
Print Resolution	510×306/408/510 dpi	304×255/304/405dpi
Speed	75~120m/min	50~100m/min
Number of Print Heads per Unit	3	3/6
Numbers of Units per Controller	Up to 6	
Ink Options	UV curable, Oil-based, Solvent-based	
Substrates Options	Paper, PP Synthetic Paper, PET, PVC, PE, PP Film
