Welcome to visit our booth D-23 on PAGE 2013 in Japan from Feb 6th - 8th

Founder will attend PAGE 2013 in Japan from Feb 6th - 8th. We sincerely welcome you to visit our booth D-23 in Tokyo Japan during that time.

PAGE is one of the most important printing exhibition in Japan. It has been successfully held 25 years annually since the year of 1988. The holder JAGET (Japanese printing Technology Association) attracted more than 100 exhibitors for this year. Founder will bring packaging software PaSharp and PhotoPack, design software SuperLine, and Founder Font to the exhibition.

Product News

Founder PhotoPack was officially released to overseas market in the end of 2012

Founder released another packaging software PhotoPack which is an image processing plug-in suite for Adobe Photoshop™. As the world leading packaging and decoration image processing application, PhotoPack introduces pro-level line extractor, color separation and Seamless Nesting functions to Photoshop™ in addition to a series of raster image processing tools enabling prepress operators to produce high quality work more efficiently.

Key Features of PhotoPack

- **Line Extractor** – This versatile tool can extract lines from raster images and isolate them on a spot color channel or layer for trapping or overprint purposes.
- **Color Separation** – This powerful color separation plug-in consists of practical editing tools for separating CMYK images into spot colors either automatically or manually with real time preview.
- **Seamless Nesting** – Adaptable tool that integrates , Seamless Joining and Nesting functions to produce seamless tiles. Also works with scanned images spoiled by rotation, translation or distortion.
- **Rich Black Conversion** – This plug-in enables rapid rich to single black conversion with real-time preview and accurate sample-point ink control.
- **Spot Color Layer** – Automatic conversion of specified layer contents into spot color channels while maintaining the image effect. Multiple spot colors can be converted simultaneously.
- **Trap** – Automatic image trapping between spot colors or spots and CMYK featuring advanced gap and overlap settings as well as interactive trapping for selections.

Founder PaSharp earned its first rebranding OEM contract in December 2012

Founder PaSharp earned its first OEM contract from a well known packaging solution supplier in December 2012. Founder PaSharp is another competitive software technology after Founder EagleRIP which has been successfully accepted by global prepress printing solution industry. The signed of OEM contract shows the strong confidence of global market for Founder packaging software technique.

As one of the best packaging software, Founder PaSharp has been well improved and successfully installed more than 2000 sets during the last 3 years. The easy-to-use functions and high quality after-sale service benefit Founder PaSharp more than 90% of China's domestic market share in gravure and flexo, and a very competitive position in global market.

Founder PSPNT (Commercial Version) withdraw from domestic Chinese market

Founder has already officially discontinued PSPNT (Commercial Version) from China's domestic market since January 31st, 2013. Although PSPNT is still available outside of the mainland China, we highly recommend to take ElecRoc (Simplified Chinese Version) in consideration as the substitution and upgrade solution. As there will no longer be any upgrade service for PSPNT in the future, meanwhile ElecRoc (Simplified Chinese Version) can easily cover all the PSPNT functions and has better customer experience feedback.
