

How to save templates

The templates created from the imposition can be saved into a special folder, please according to the following steps.

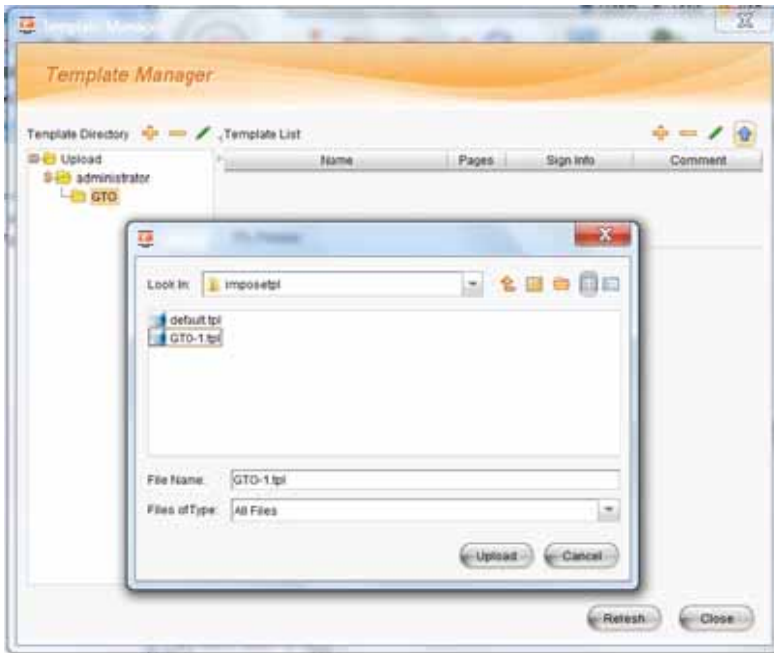

1, Run ElecRoc 5 Client, click Template Manager from Tools, then click  on the left up, for example create a New Sub-Directory, GTO, under administrator. And suppose you want to save the templates into folder upload\administrator\GTO.

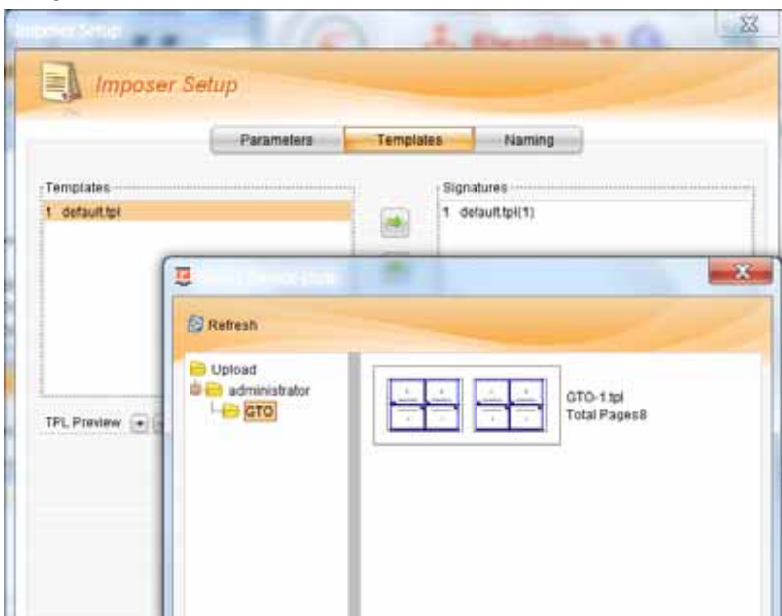

2, Create a new job ticket, drag Imposer module in it. Select New TPL in Templates, then edit the template which you want. Click save and submit when you finish the edition.

3, Exit Impsoer, click Tools\Template Manager from Client. Click on folder GTO, then click  button on the right up. Find out the template which you made from the imposition. The template locates in a shared folder Jobs on the server. Then click Upload.

4, The template GTO-1.tpl will be saved into folder Upload\administrator\GTO, then you can use it in the jobs.
